

# The Stripe Guy

## EXTERIOR GRAPHICS CARE

---

**"TODAY'S FINEST PRESSURE SENSITIVE GRAPHICS HAVE BEEN PROFESSIONALLY APPLIED TO YOUR VEHICLE. THESE GRAPHICS REQUIRE LITTLE MAINTENANCE AND SHOULD BE TREATED SIMILARLY TO A PAINTED SURFACE."**

- ✓ **DO** wash your graphics with plain soap and water or any car wash soap. Rinse thoroughly.
- ✓ **DO** keep high pressure nozzles at least 1 ½ feet from the edge of the graphics. High pressure spray may cause the edge of the graphic to peel.
- ✓ **DO** test any cleaning solution on a small section of the decal before using.
- ✗ **DON'T** use any aromatic solvents such as acetone, M.E.K., toluene, paint thinner, lacquer thinner on your graphics. Any solvent may soften or smear colors.
- ✗ **DON'T** overcoat the graphics with clear paint.
- ✗ **DON'T** let gasoline or other fuels drip or stay on graphics for any length of time. If a spill occurs, wipe off and rinse with water immediately.
- ✗ **DON'T** paint over the graphics.
- ✗ **DON'T** apply wax over graphics, especially if the wax contains any petroleum distillates. Wax that has dried between stripes can be removed by softening it with rubbing alcohol and cotton swabs. Be sure to rinse the area after cleaning.

**CARE AND CAUTION** should be taken when storing your vehicle. Vinly graphics and other items such as dashboards, tires and flexible rubber products will have a shorter life expectancy when exposed to severe heat and sunlight. Protection of graphics from prolonged direct sunlight will insure an extended life. ENJOY YOUR NEW GRAPHICS
